

ANNUITY SAVINGS ACCOUNT ACTIVITY

PERF statutes require interest for the Guaranteed Fund, and a market value increase or decrease for the Money Market, Bond, S&P 500 Stock Index, and U.S. Small Companies Stock Funds to be credited on the last day of each calendar quarter. Crediting is based on the investment directions you choose and the previous quarter balance of your Annuity Savings Account.

Keep in mind, historical returns are not an indicator of future returns. There are important differences among the funds. Each of them has a specific investment objective, and other than the Guaranteed Fund, has certain investment risks. When choosing your investment direction, remember you should take into account your time horizon, risk tolerance and the importance of diversifying your investments.

The fund's performance is driven by country risk (the chance a particular foreign country's economy will be hurt by political upheaval, financial troubles or a natural disaster); currency risk (the chance that investments in a particular country will decrease in value if the U. S. dollar rises in value against that country's currency); and investment style risk (the chance that returns from foreign stocks will trail returns from other stock markets).
